The **DELUXE TOILET** is our top of the range toilet facility designed with weddings and high quality events in mind. The female touch in the design process is evident throughout with mirrors at every turn and the extended vanity unit on hand to place your belongings. This is not to say that this versatile facility is solely for single sex use, as it is just as effective in unisex mode.

The Deluxe Toilet is a jackleg unit hence its width is not restricted to 7'6" as with common trailer mounted toilets. The extra width and halogen lighting provides an extremely light and spacious experience.
