The **ORIGINAL SLEEPER** provides comfortable living accommodation for one or two people. This unit was designed to satisfy the requirements of both temporary student accommodation and the rigorous demands of the construction industry. When used as a one man unit we can take out the bed on the left and replace it with a desk and a set of drawers.

The en-suite features an energy efficient powerful mains fed shower, water flushing toilet and wash basin. Heating is provided by an electric oil filled radiator and insulation ensures the cabin is warm in winter and cool in summer.

Security features include double glazed windows with security glass and a solid core door fitted with a security lock.
